Modular filters B 2200 EFM and B 3500 EFM are the basic components for modular filter solutions in heavy-duty designs for extreme particle contamination. A modular filter system can be flexibly connected to the pipelines. The design of the fan unit(s) is also flexible, depending on the specifications. Ideal for air treatment systems. For energy efficient and powerful air filtration of volumes from 2000 to 42000 m<sup>3</sup>/h and more.

All modular filters comprise 1 pre-/after filter consisting of the stainless steel mesh, 1 ionizer cell, 1 collector cell, 1 steel sheet metal housing. Collector cell plate distance 8 mm. Air direction optionally from left/right or right/left. Option: Baffle plate pre-separator 30 mm, stainless steel mesh pre-/after filter 50 instead of 20 mm. \*Height with adjustable feet: add 150 mm.
